

Please allow the telephone privacy call list to stay in effect! The calls we used to get before the list were unbearable! We could not set down as a family and enjoy a meal without getting an unnecessary phone call. We have call waiting and we could not carry on a conversation without clicking over to hear "Do you want to change your long distance". Please do not change this--we would probably just do away with phone service if we could not continue to enjoy our privacy!! Thank you!
